End to End Labeling

Mobile Application For Operations

Order Integrations

A warehouse management system is a software application designed to support and optimize warehouse functionality and distribution center management. These systems facilitate management in their daily planning, organizing, staffing, directing and controlling the utilization of available resources, to move and store materials into, within, and out of a warehouse, while supporting staff in the performance of material movement and storage in and around a warehouse.

**FortKnox** has seamless Order Integration capabilities & also FortKnox has its own accounting package integrated with WMS for your organization to have end to end to view

## FORTKNOX WMS & BOOKS

• WMS • ACCOUNTING • CRM

### WMS – At your finger tip.

Grow your business with FortKnox

# 99.9%

Quick decisions in warehousing will yield out better results when done on time.

- Inward & Outward Dispatch Monitors
- Rejects & Damage Monitoring
- Excess & Short Supply Monitoring
- Real time Order Counts
- Delay Due Diligence
- 3PL View

FORTKNOX FOCUSES ON INCREASING PRODUCTIVITY, MAXIMIZING EFFICIENCY, IMPROVING INVENTORY ACCURACY AND REDUCING COSTS.

**FORTKNOX WMS** IS AN ENTERPRISE GRADE ADVANCED WAREHOUSE MANAGEMENT SYSTEM THAT PROVIDES SEAMLESS VISIBILITY OF INVENTORY FROM THE TIME IT ENTERS THE WAREHOUSE UNTIL IT LEAVES THE FACILITY.

We support barcode & QR code technologies. This suite covers all significant warehousing activities such as receiving, putaway, inventory, multi UOM conversions, order full fillment quality control, location planning along with picking, checking, packing & shipping.

## Key Benefits

- Improved inventory visibility and accuracy allows for greater planning and control.
- Optimize resources in terms of manpower, equipment and warehouse space utilization.
- Efficient order processing through optimized pick paths.
- Error free auto data capture with QR/barcode technologies.
- Controlling purchase from the material flow and ageing analysis.
- Improved order fulfilment, accuracy and speed.
- Real-time event based integration with ERP's for synchronized data
- Quick view of floor plans with aisle, rack, bay and bins and real-time inventory data through virtual warehouse.
